

Building Permit Requirements

- One set of Plans in detail.
- Plans must include front, rear, and cross sectional views and elevations.
- Plans must show (as applicable) water run-off and erosion control (silt fence, straw bales).
- Application must include energy requirements: per the Pennsylvania's Alternative Residential Energy Provisions.
- Copy of Contractors Workers Compensation Insurance.
- Copy of Property Survey (show proposed project and front, side and / or rear setbacks).
- Appropriate fees - we accept cash, checks or Master Card, Visa and Discover Cards.
- A completed application - signed and dated.

After the application and all required documents are submitted with the applicable fees, the building inspector will review it to make sure the project is code compliant and issue a building permit.
